THE COUNCIL FOR TOBACCO RESEARCH - U.S.A.

August 1, 1967

MEMORANDUM

Defer until
Dec. pending
discussion re
animal /
spontaneous

TO: The committee comprising Dr. Little, Chm., Dr. Cattell and Dr. Jacobson.

FROM: Robert C. Hockett

SUBJECT: New grant application from Walter B. Essman, Ph.D. - No. 623.

We enclose herewith a new grant application from Walter B. Essman, Ph.D. of Queens College of the City University of New York, Flushing, New York.

The proposed study is supported by some preliminary data reporting the effects of the rather large doses of nicotine employed on brain chemistry and retention of learning. It appears to be a sound scientific program and a competent investigator - and the main consideration may be whether or not we should support further work in this area in which we already have a number of projects.

The application from Dr. Irving Geller - No. 622, which will be on the agenda for the September meeting covers much of the same ground.

Robert C. Hockett
